Announces \$500 million share repurchase program

WALTHAM, Mass., May 15, 2024 - Dynatrace (NYSE: DT), the leader in unified observability and security, today announced financial results for the fourth quarter and full year ended March 31, 2024.

"Dynatrace delivered a strong finish to fiscal 2024. Our fourth quarter results exceeded guidance across all key operating metrics, fueled in part by a record number of 7-figure deals closed in the quarter," said Rick McConnell, Chief Executive Officer. "We continue to see a growing number of companies looking to consolidate often ineffective and costly monitoring tools into a unified observability platform. We believe that our contextual analytics, Al leadership, and automation differentiate us in the market and empower us to capture this opportunity."

"The share repurchase program demonstrates our confidence in the business and conviction in our future growth prospects," said Jim Benson, Chief Financial Officer. All growth rates are compared to the fourth quarter and full year of fiscal 2023 unless otherwise noted.

* Use of Non-GAAP Financial Measures

In our earnings press releases, conference calls, slide presentations, and webcasts, we may use or discuss non-GAAP financial measures, as defined by Regulation G. The GAAP financial measure most directly comparable to each non-GAAP financial measure used or discussed, and a reconciliation of the differences between each non-GAAP financial measure and the comparable GAAP financial measure, are included in this press release after the consolidated financial statements. Our earnings press releases containing such non-GAAP reconciliations can be found in the Investor Relations section of our website at ir.dynatrace.com.

Financial Outlook

Based on information available as of May 15, 2024, Dynatrace is issuing guidance for the first quarter and full year fiscal 2025 in the table below. This guidance is based on foreign exchange rates as of April 30, 2024. The total foreign exchange headwind for fiscal 2025 is expected to be approximately \$10 million on ARR and revenue.

Growth rates for ARR, Total revenue, and Subscription revenue are presented in constant currency to provide better visibility into the underlying growth of the business.

All growth rates are compared to the first quarter and full year of fiscal 2024 unless otherwise noted.

^{*}Guidance growth rates rounded to the nearest percentage point.

Reconciliations of non-GAAP income from operations, non-GAAP net income, non-GAAP net income per diluted share and free cash flow guidance to the most directly comparable GAAP measures are not available without unreasonable efforts on a forward-looking basis due to the high variability, complexity and low visibility with respect to the charges excluded from these non-GAAP measures; in particular, the measures and effects of share-based compensation expense, employer taxes and tax deductions specific to equity compensation awards that are directly impacted by future hiring, turnover and retention needs, as well as unpredictable fluctuations in our stock price. We expect the variability of the above charges to have a significant, and potentially unpredictable, impact on our future GAAP financial results.

Non-GAAP Financial Measures & Key Metrics

In addition to disclosing financial measures prepared in accordance with GAAP, this press release and the accompanying tables contain certain non-GAAP financial measures.

Non-GAAP financial measures do not have any standardized meaning and are therefore unlikely to be comparable to similarly titled measures presented by other companies. Dynatrace considers these non-GAAP financial measures to be important because they provide useful indicators of its performance and liquidity measures. These are key measures used by our management and Board of Directors to understand and evaluate our core operating performance and trends, to prepare and approve our annual budget and to develop short and long-term operational plans. In addition, investors often use similar measures to evaluate the performance of a company. Non-GAAP financial measures are presented for supplemental informational purposes only for understanding the company's operating performance. The non-GAAP financial measures should not be considered a substitute for financial information presented in accordance with GAAP, and may be different from non-GAAP financial measures presented by other companies. The GAAP financial measure most directly comparable to each non-GAAP financial measure used or discussed, and a reconciliation of the differences between each non-GAAP financial measure and the comparable GAAP financial measure, are included in this press release after the consolidated financial statements.

Dynatrace presents constant currency amounts for Revenue and Annual Recurring Revenue to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign currency rate fluctuations. Dynatrace provides this non-GAAP financial information to aid investors in better understanding our performance.

Annual Recurring Revenue (ARR) is defined as the daily revenue of all subscription agreements that are actively generating revenue as of the last day of the reporting period multiplied by 365. We exclude from our calculation of Total ARR any revenues derived from month-to-month agreements and/or product usage overage billings.

Constant Currency amounts for ARR, Total Revenue and Subscription Revenue are presented to provide a framework for assessing how our underlying businesses performed excluding the effect of foreign exchange rate fluctuations. To present this information, current and comparative prior period results for entities reporting in currencies other than United States dollars are converted into United States dollars using the average exchange rates from the comparative period rather than the actual exchange rates in effect during the respective periods. All growth comparisons relate to the corresponding period in the last fiscal year.

Dynatrace Customers are defined as accounts, as identified by a unique account identifier, that generate at least \$10,000 of Dynatrace ARR as of the reporting date. In infrequent cases, a single large organization may comprise multiple customer accounts when there are distinct divisions, departments or subsidiaries that operate and make purchasing decisions independently from the parent organization. In cases where multiple customer accounts exist under a single organization, each customer account is counted separately based on a mutually exclusive accounting of ARR.

Free Cash Flow is defined as net cash provided by (used in) operating activities less capital expenditures (reflected as "purchase of property and equipment" and "capitalized software additions" in our financial statements).
